## PARKEA

COATINGS FOR WOODEN FLOORING

PARKEA FIRE RETARDANT, WATER-BASED FIRE-RETARDANT CYCLE

VPWR is a water-based fire-retardant cycle for the coating of wooden flooring made using any wood species. The cycle, composed of 2 base coats and 1 top coat, is in Euro class Bfl-s1.

Manual roller or spray application.

---

**FEATURES & ADVANTAGES**

- Cycle in Euro class Bfl-s1, in compliance with the UNI EN ISO 13501-1 European standard.
- Good chemical/physical resistance of the top coat.
- Available gloss levels from 5 to 90 gloss.
- Suitable for any wood species.

---

**TECHNICAL SPECIFICATION**

**COATING CYCLE**

- **PARKEA** bi-component water-based base coat = 10% CAS50FR - 120 g/m<sup>2</sup>.
- Maximum drying time 1 hour at 20°C and 60% R.H.
- **PARKEA** bi-component water-based base coat = 10% CAS50FR - 120 g/m<sup>2</sup>.
- Maximum drying time 4 hours at 20°C and 60% R.H.
- Sanding.
- **VPARKEA** bi-component water-based top coat (from 5 to 90 gloss) = 10% CAS50FR - 120 g/m<sup>2</sup>.

**Notes:**

- The products do not need to be diluted, although if necessary they can be 5-10% diluted with deionized water.
- If using mixed species, first use rich in extractive substances, it is recommended to apply an initial coat of FAVO water-based base coat/stone, 10% catalyzed with CAS50.
